

**CITY OF BALTIMORE
COUNCIL BILL 07-0322R
(Resolution)**

Introduced by: Councilmembers Clarke, Holton, D’Adamo, Middleton, Kraft, Spector,
Conaway, Reisinger
At the request of: The Traffic Calming & Pedestrian-Friendliness Task Force
Address: c/o Jamie Kenrick, Baltimore City Department of Transportation, 417 East Fayette
Street, Baltimore, Maryland 21202
Telephone: 410-396-6802

Introduced and read first time: August 13, 2007

Assigned to: Land Use and Transportation Committee

REFERRED TO THE FOLLOWING AGENCIES: City Solicitor, Planning Department, Department of
Transportation

A RESOLUTION ENTITLED

1 A COUNCIL RESOLUTION concerning

2 **Request for State Legislation – Automated Speed Enforcement**

3 FOR the purpose of requesting the Honorable Chairs and Members of the Baltimore City Senate
4 and House Delegations to the 2008 Maryland General Assembly to sponsor legislation to
5 grant authority to Baltimore City to implement an automated speed enforcement program and
6 urging the Governor to support this legislation to protect our residential and school
7 communities from unsafe vehicular traffic.

8 **Recitals**

9 In May, 2006, the Baltimore City Council created *The Baltimore City Traffic Calming and*
10 *Pedestrian-Friendly Task Force*, a Citywide neighborhood and school-based body, in
11 cooperation with the Departments of Transportation and Planning, with the purpose to “design
12 and adopt Baltimore City traffic calming and pedestrian-friendly goals, policies, procedures and
13 time lines that ensure safer traffic and pedestrian conditions for Baltimore’s residential and
14 school communities.”

15 The Traffic Calming Task Force found, in part, that: 2 primary concerns of residents seeking
16 calming solutions are reductions in traffic speed and cut-through traffic; speeding on high
17 volume, major roadways (arterials) requires an enforcement-based approach to traffic calming
18 and that the Baltimore Police Department, even with support from State police agencies, does
19 not have sufficient resources to enforce the City’s traffic laws; and speed enforcement is the
20 most effective means to calm traffic on arterial roadways and speed cameras are a cost-effective
21 means to apply speed enforcement.

22 As an integral part of achieving its traffic calming goals, the Task Force seeks state
23 legislation enabling the use of automated speed enforcement systems in the City. – “As a starting
24 point the Task Force recommends placing speed cameras near schools, recreation centers, parks
25 and churches” and that “the automated speed enforcement concept is similar to the current ‘Red
26 Light Camera’ concept currently implemented in the City of Baltimore, except it is usually

Council Bill 07-0322R

1 deployed first in unmarked vehicles to leverage its effectiveness. They can be installed in fixed
2 locations as well. This technology is not experimental; it has been in operation for many years
3 and is currently deployed in the District of Columbia and Montgomery County.”

4 Passage of enabling legislation giving Baltimore City the authority it seeks is in keeping with
5 the actions of the Maryland State Legislature in granting Montgomery County like authority in
6 2006 to conduct a pilot automated speed limit enforcement program in residential areas and in
7 school zones with speed limits of 35 mph or less and similar automated speed enforcement
8 programs are also being initiated in Chevy Chase Village and the cities of Rockville and
9 Gaithersburg, Maryland.

10 In March 2007, Montgomery County launched Safe Speed, the first automated speed
11 enforcement program in Maryland. The Safe Speed program will initially involve 6 mobile speed
12 enforcement vans equipped with radar cameras. The mobile units will rotate through designated
13 speed enforcement zones that meet the location and speed requirements. Additional cameras will
14 be added at a later date. The cameras will photograph vehicles traveling more than 10 mph above
15 the posted speed limit. There will be an initial 30-day warning period during which violators will
16 be issued warnings by mail. At the end of the warning period, citations will be issued.

17 At the program’s inauguration, the Montgomery County Executive stated that the goal was to
18 ensure safer streets – “speeding is a serious traffic problem that increases the risks of crashes,
19 injuries and deaths – with the introduction of the Safe Speed program, we intend to make
20 Montgomery County safer for both pedestrians and motorist.”

21 In seeking state enabling legislation, Baltimore City hopes to provide equal protection for our
22 pedestrians and motorists as well as the many visitors and workers that navigate the streets of our
23 bustling city each and every day.

24 **NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF BALTIMORE,** That this
25 Body respectfully requests the Honorable Chairs and Members of the Baltimore City Senate and
26 House Delegations to the 2008 Maryland General Assembly to sponsor legislation to grant
27 authority to Baltimore City to implement an automated speed enforcement program and urges
28 the Governor to support this legislation to protect our residential and school communities from
29 unsafe vehicular traffic.

30 **AND BE IT FURTHER RESOLVED,** That a copy of this Resolution be sent to the Governor, the
31 Honorable Chairs and Members of the Senate and House Delegations to the Maryland General
32 Assembly, the Mayor, the Director of the Baltimore City Department of Transportation, the
33 Director of the Baltimore City Department of Planning, the Executive Director of the Mayor’s
34 Office of State Relations, and the Mayor’s Legislative Liaison to the City Council.
