

**CITY OF BALTIMORE  
COUNCIL BILL 14-0161R  
(Resolution)**

---

Introduced by: Councilmembers Henry, Kraft, Stokes, Mosby, Cole, Holton, Spector, Clarke,  
Middleton, Branch, Scott, President Young, Councilmembers Curran, Reisinger

Introduced and read first time: March 24, 2014

Assigned to: Judiciary and Legislative Investigations Committee

---

REFERRED TO THE FOLLOWING AGENCIES: Department of General Services, Office of  
Sustainability, Baltimore City Public School System

---

A RESOLUTION ENTITLED

1 A COUNCIL RESOLUTION concerning

2 **Baltimore City’s Current and Future Solar and Other Renewable Energy Plans**

3 FOR the purpose of reiterating the Council’s support for the City’s stated policy of promoting the  
4 use of solar and other renewable energy and inviting representatives from the agencies best  
5 positioned to implement that policy to appear before it to discuss Baltimore’s current and  
6 future solar and other renewable energy plans.

7 **Recitals**

8 As part of the Sustainability Plan adopted by the Council in March of 2009, Baltimore City  
9 has a stated policy of promoting the use of solar and other renewable energy sources. However,  
10 it is not clear what steps the City is currently taking to put this policy into effect to maximize the  
11 generation of renewable energy within Baltimore.

12 The time is ripe to comprehensively review the City’s approach to renewable energy because  
13 changing technology, together with a number of once-in-a-lifetime efforts currently underway in  
14 seemingly unrelated areas, present opportunities to significantly increase renewable energy  
15 generation in Baltimore. It is important that we don’t miss out on these opportunities to reshape  
16 Baltimore’s energy landscape for the better.

17 The current comprehensive rewrite of the City’s Zoning Code represents a once-in-a-  
18 generation chance to examine how well the City’s current land use laws encourage large or small  
19 scale renewable energy generation. As just one example, the City should be acting to encourage  
20 people to establish rooftop and carport solar panels, the latter of which are high enough that cars  
21 are able to park underneath and be protected from the elements, and it is not clear whether the  
22 current laws provide a supportive enough structure for this activity or if changes should be made.  
23 It’s important to establish a clear picture of the legal obstacles to renewable energy so that  
24 appropriate changes can be made to overcome these obstacles, and the broader structure of the  
25 City’s Zoning Code can be designed to reflect renewable energy concerns.

26 Similarly, the massive billion dollar school construction and rehabilitation project kicking off  
27 shortly represents an opportunity to re-imagine the school system’s use of renewable energy. If  
28 buildings are planned from the ground up to take advantage of the opportunities that renewable  
29 energy generation can provide for greener, more efficient and self-sufficient structures, a real

EXPLANATION: Underlining indicates matter added by amendment.  
~~Strike out~~ indicates matter deleted by amendment.

## Council Bill 14-0161R

1 impact can be made on the environment, future school energy costs, and students' awareness of  
2 renewable energy.

3 Beyond these significant opportunities, it is important to periodically review the City's efforts  
4 to promote renewable energy and to compare these efforts to the whole gamut of possibilities that  
5 steadily advancing renewable energy technology continues to open up. In order to ensure that the  
6 City's commitment to expanding renewable energy use goes beyond words and has the widest  
7 possible impact, the full range of policies that can encourage or discourage renewable energy use  
8 needs to be constantly reexamined.

9 **NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF BALTIMORE,** That the  
10 Council reiterates its support for the City's stated policy of promoting the use of solar and other  
11 renewable energy and invites representatives from the agencies best positioned to implement that  
12 policy to appear before it to discuss Baltimore's current and future solar and other renewable  
13 energy plans.

14 **AND BE IT FURTHER RESOLVED,** That a copy of this Resolution be sent to the Mayor, the  
15 Director of General Services, the Director of the Office of Sustainability, the CEO of Baltimore  
16 Public Schools, and the Mayor's Legislative Liaison to the City Council.
