

**CITY OF BALTIMORE
COUNCIL BILL 17-0027R
(Resolution)**

Introduced by: Councilmembers Scott, Cohen, Costello, Pinkett, Dorsey, Bullock, Clarke, Reisinger, President Young, Councilmembers Middleton, Stokes, Burnett, Sneed, Henry, Schleifer

Introduced and read first time: June 5, 2017

Assigned to: Public Safety Committee

REFERRED TO THE FOLLOWING AGENCIES: Health Department, Baltimore City Public School System, Police Department, Department of Housing and Community Development, Department of Recreation and Parks, Mayor's Office of Employment Development, Mayor's Office of Criminal Justice, Fire Department

A RESOLUTION ENTITLED

1 A COUNCIL RESOLUTION concerning

2 **A Baltimore Comprehensive Gun Violence Reduction Strategy (Live to BMore)**

3 FOR the purpose of calling on the Mayor of Baltimore, the Baltimore City Health Department, the
4 Baltimore City Police Department, Baltimore City Public Schools, and all other relevant
5 agencies to develop a Comprehensive Gun Violence Reduction Strategy for Baltimore.

6 **Recitals**

7 Gun Violence is a disease that is plaguing many Baltimore neighborhoods and taking the
8 lives of too many young Baltimoreans. For many years Baltimore looked at gun violence as
9 simply a police issue with no connectivity to the other city agencies. However, in recent years
10 that has begun to change with Baltimore doing away with Zero Tolerance Policing and
11 introducing programs like Safe Streets and Ceasefire.

12 However, even with these great and significant changes there is still a great need for a
13 Comprehensive Gun Violence Reduction Strategy in Baltimore similar to Nola For Life in New
14 Orleans. New Orleans, a city similar to Baltimore, has had great success with the Nola For Life
15 Strategy since it was launched in 2012, seeing an 18% reduction in homicides.

16 Nola for Life has utilized a public health approach to reducing violence since its launch in
17 2012. A central part of the public health approach to address violence is the socio-ecological
18 model, which was adapted by the Centers for Disease Control (CDC). As explained on the Nola
19 for Life website, this model takes into account the interplay between individual, relationship,
20 community, and societal factors:

- 21 • Individual – Biological and personal history factors that increase the likelihood of becoming
22 a victim or perpetrator of violence, including age, behavioral control, substance use, or
23 history of abuse.
- 24 • Relationship – Close relationships, such as partners, social-circle peers, and family.

EXPLANATION: Underlining indicates matter added by amendment.
~~Strike out~~ indicates matter deleted by amendment.

Council Bill 17-0027R

- 1 • Community – The settings, such as schools or neighborhoods, in which social relationships
2 occur and that may be associated with risk of violence.
- 3 • Societal – The broad societal factors, such as social and cultural norms, that help create a
4 climate in which violence is encouraged or inhibited.

5 **NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF BALTIMORE,** That the
6 Council calls on the Mayor of Baltimore, the Baltimore City Health Department, the Baltimore
7 City Police Department, Baltimore City Public Schools, and all other relevant agencies to
8 develop a Comprehensive Gun Violence Reduction Strategy for Baltimore.

9 **AND BE IT FURTHER RESOLVED,** That a copy of this Resolution be sent to the Mayor, the
10 Health Commissioner, the Police Commissioner, the Chief Executive Officer of Baltimore City
11 Public Schools, and the Mayor’s Legislative Liaison to the City Council.
