

Khalil Walker

4439483320

Hi my name is Khalil Walker. I am a student of Baltimore Design School class of 2024.

My bus stop is in the middle of the street with no crosswalk or traffic light to cross the street. This is one of the reasons I don't like to walk to or from the stop when it's not light outside. The City of Baltimore, the MTA, and City schools should add more shelters and better lighting to bus stops.

I chose to testify today because public transit has influenced my participation in sports, clubs, organizations, and other opportunities. I take multiple buses to get to school and they don't run on time and sometimes pass my stop when they are too full. The MTA should improve service by running buses more frequently and take City Schools student riders into account when developing bus routes.
