

Concentric Educational Solutions

Baltimore City Public Schools

Partnership Overview

School Year 2023-2024

The CES Approach

The Concentricity Framework seeks to support students, families, and schools by identifying barriers that negatively impact education and provide resources and services to improve student outcomes.

Home Visits

Mitigated chronic absenteeism by identifying and removing student barriers

Tutoring

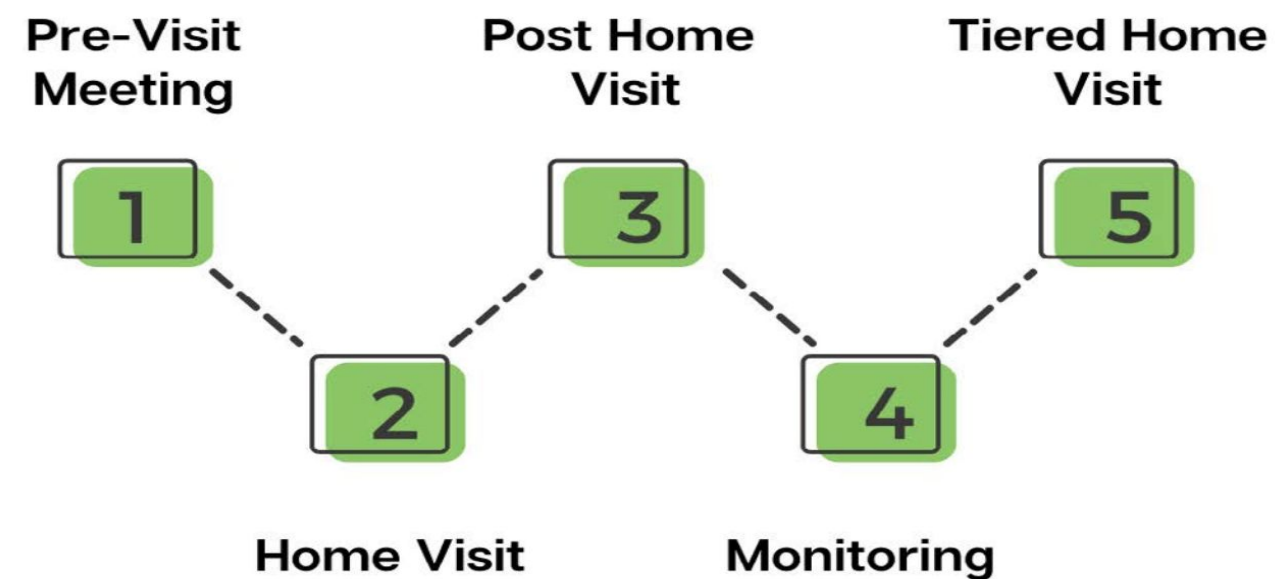

Addressed academic needs using high-dosage tutoring sessions with either a push-in or pull-out model

Mentoring

Provided social-emotional learning through individual and small group SEL sessions

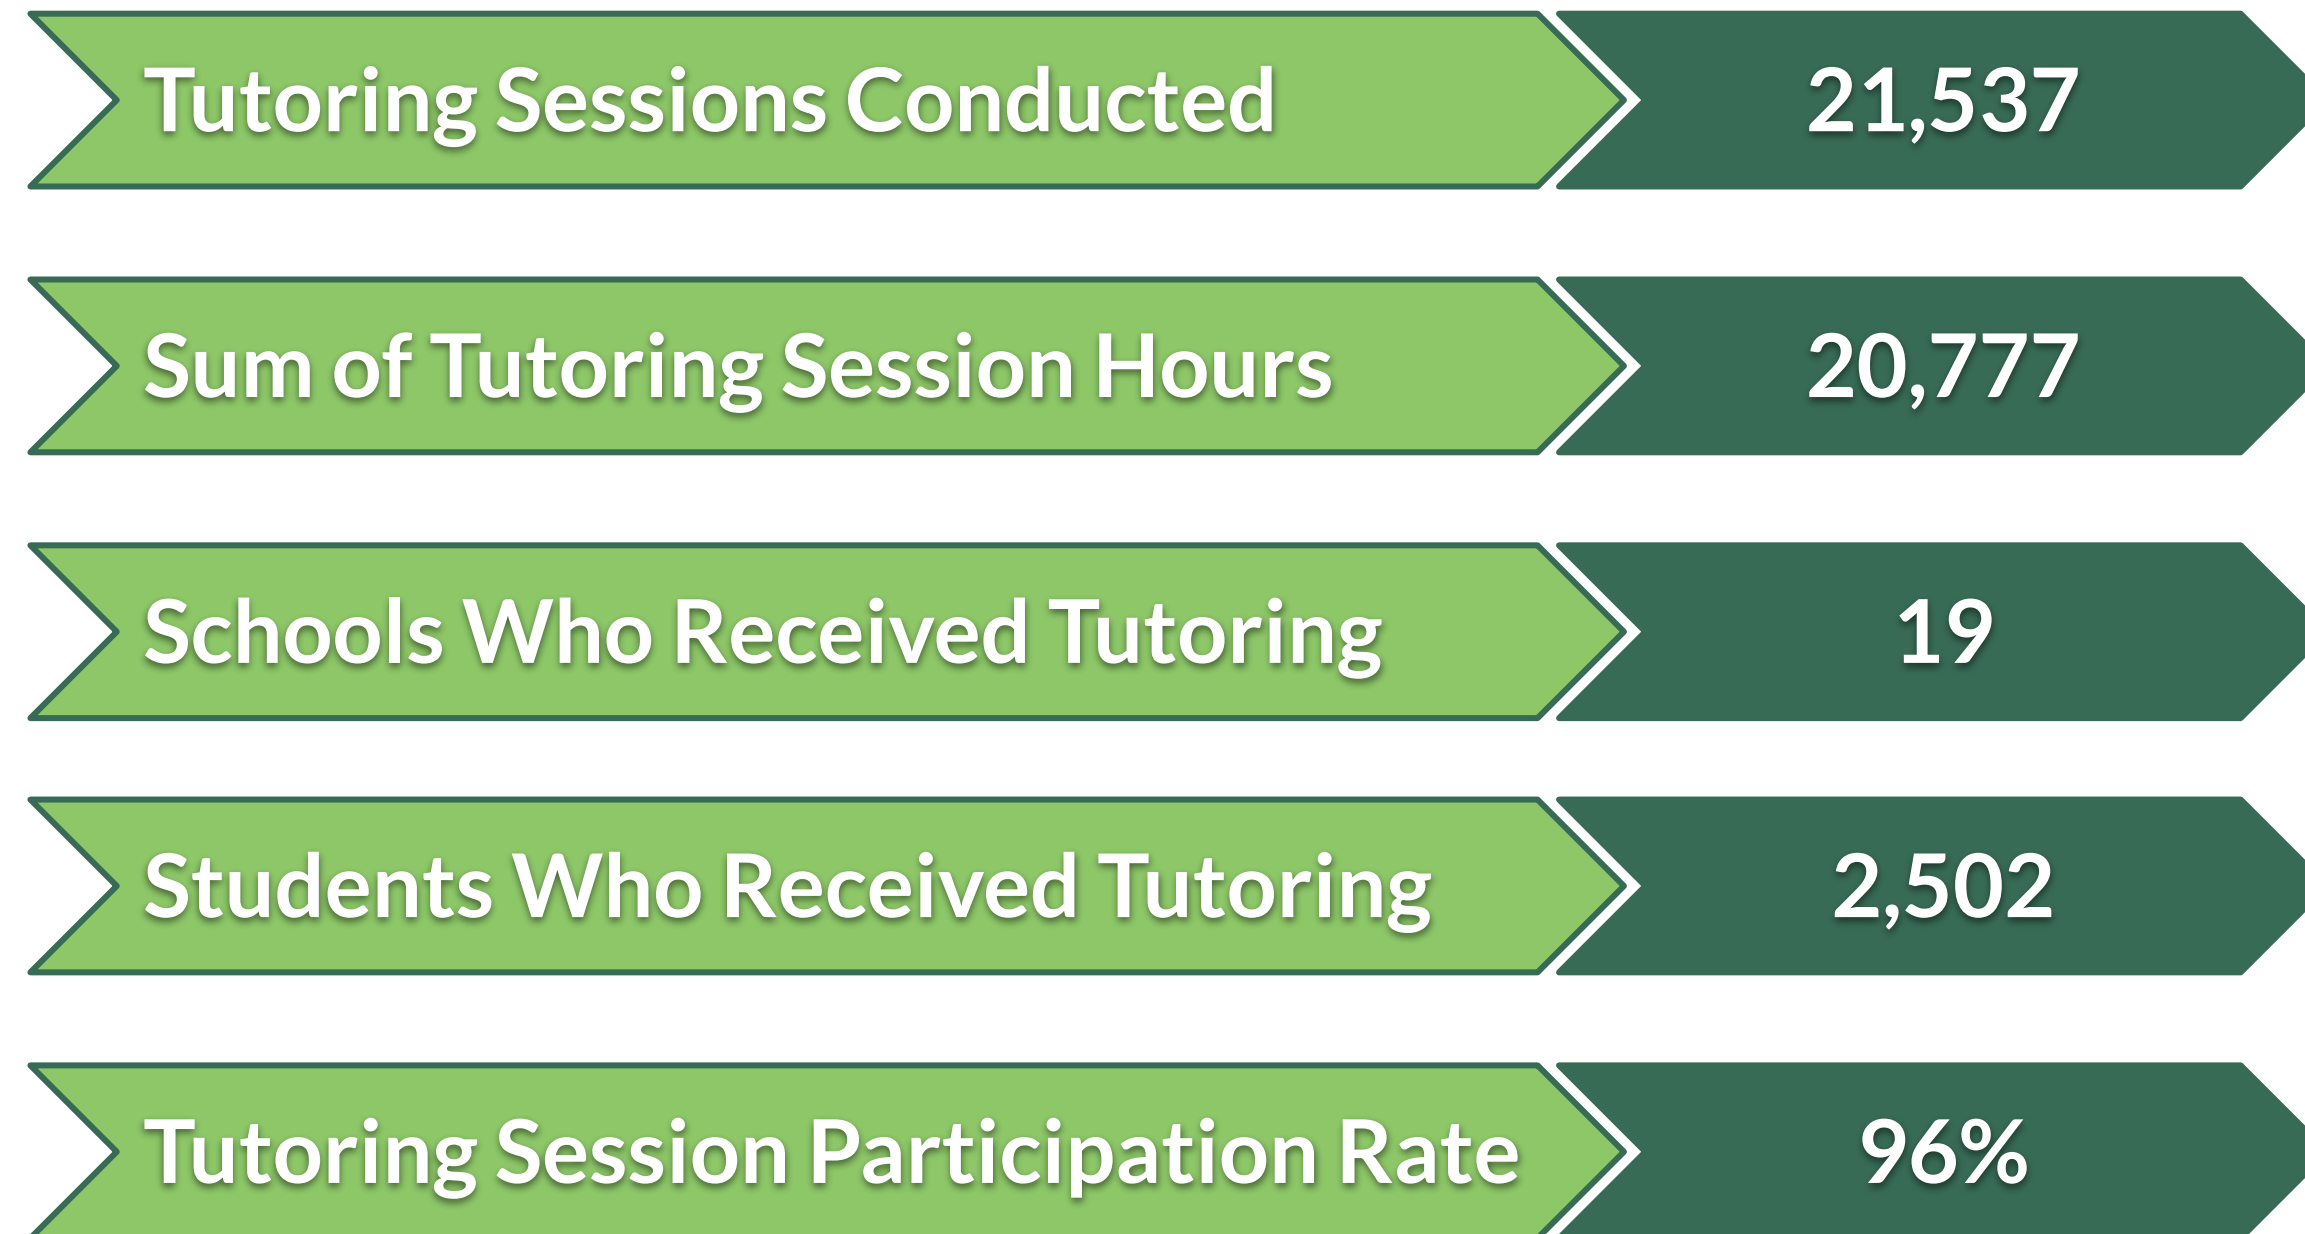

Concentric Home Visits

Concentric Tutoring

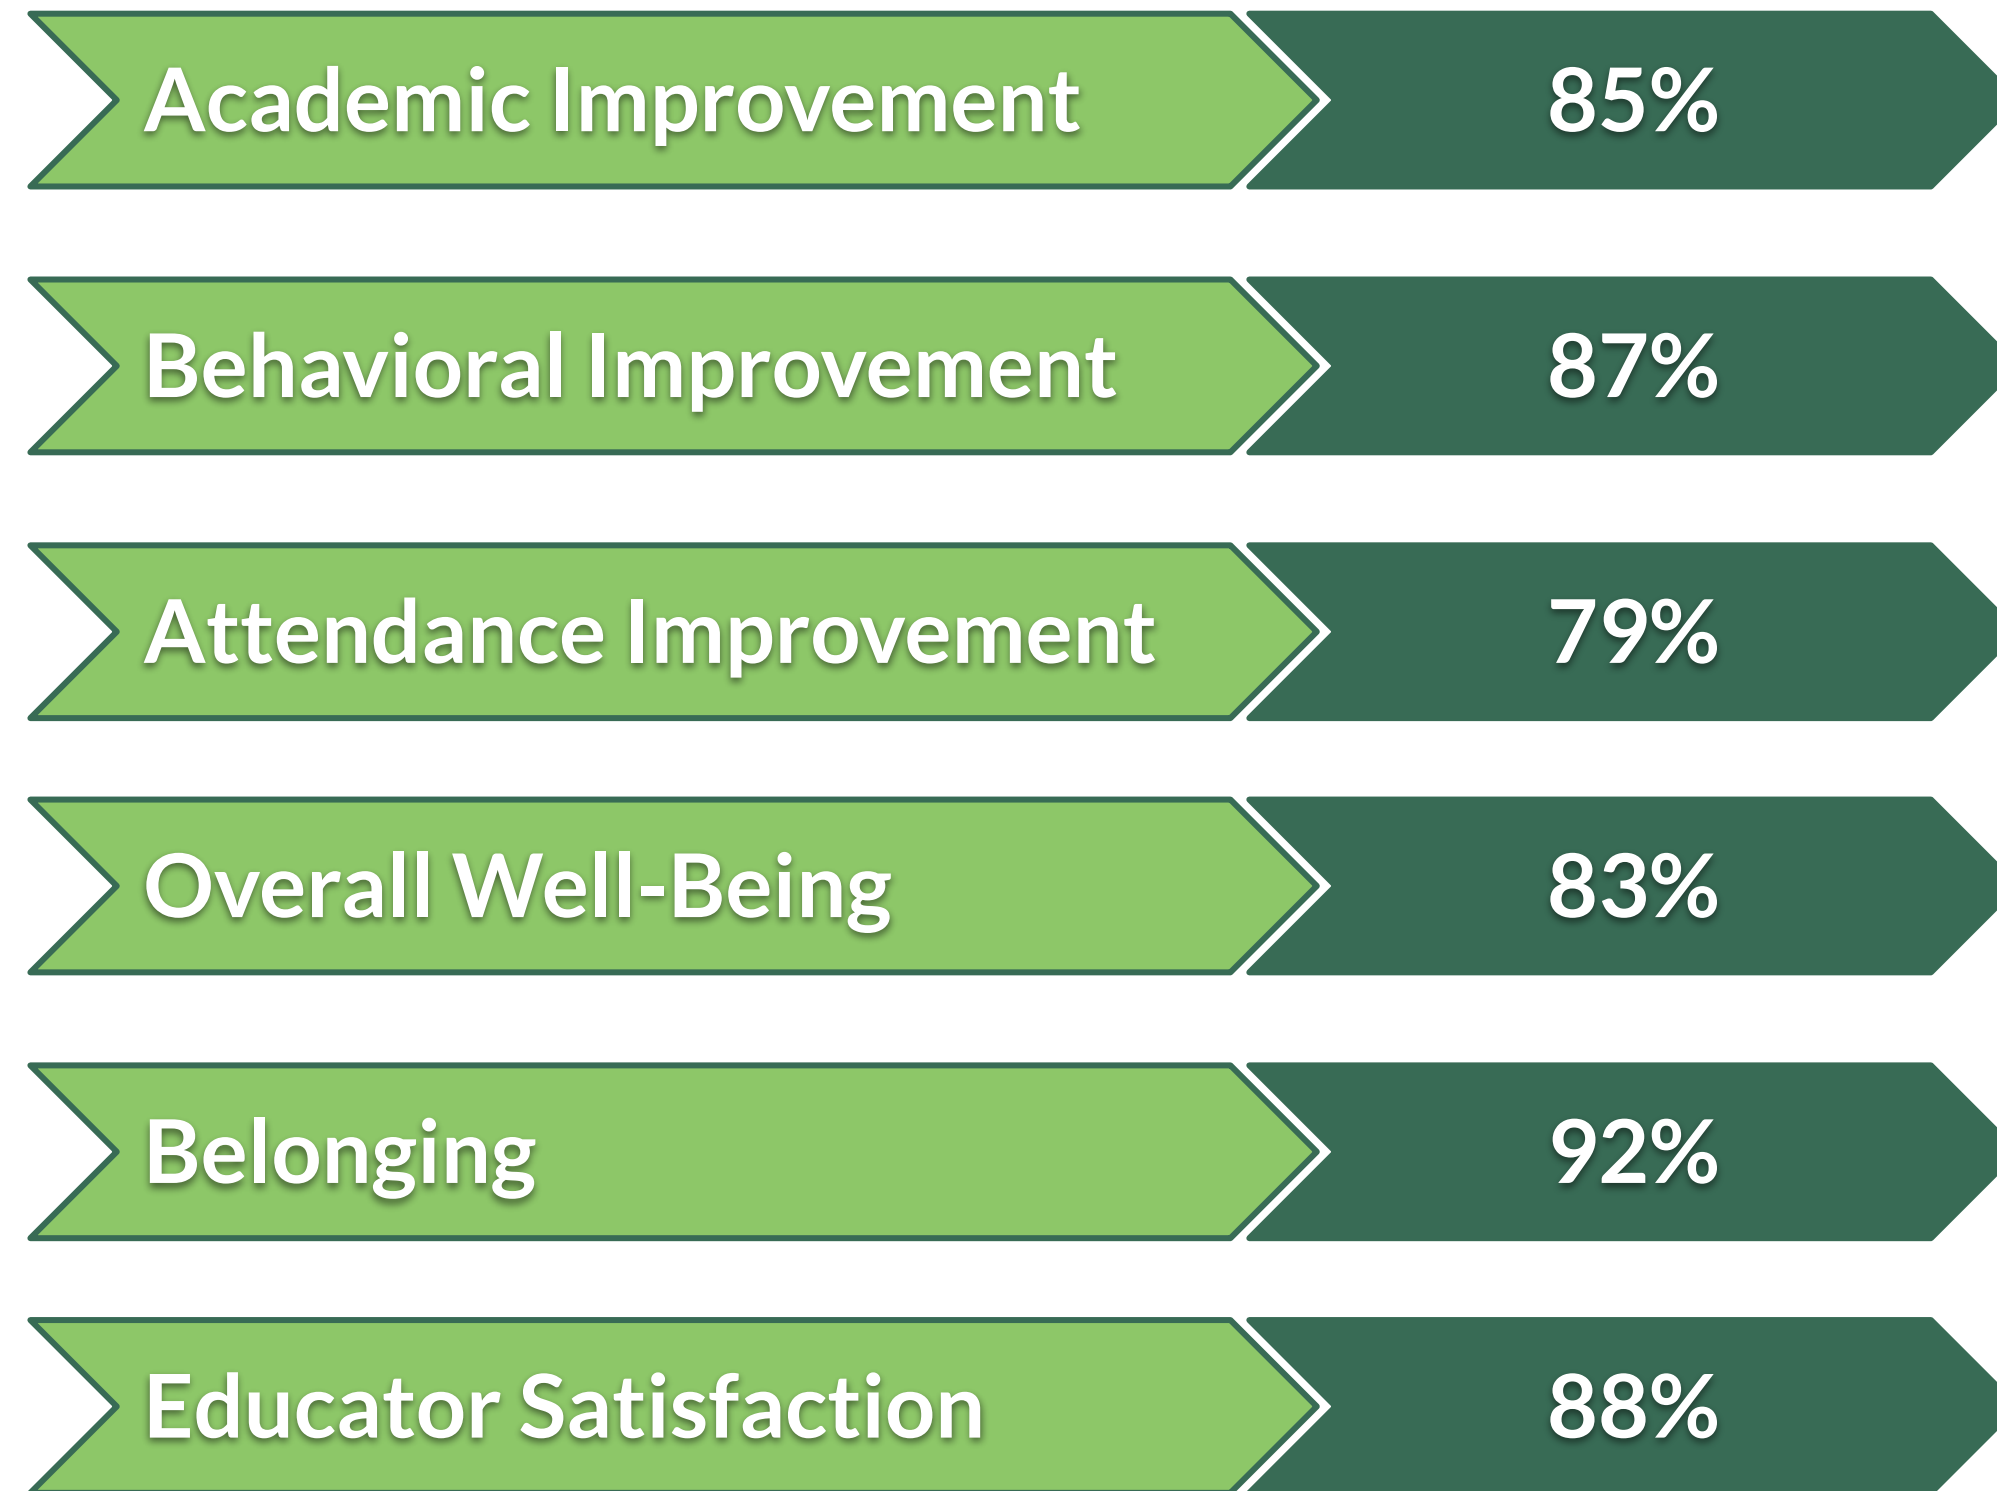

Concentric Mentoring

Concentric Student Perceptions and Partnership Satisfaction

What have we learned?

Home Visits

Home visits were designed to foster strong relationships between families and schools, and to identify and address barriers to student attendance and engagement. Students were absent most often because of student illness and lack of student interest.

Tutoring

To further enhance our impact and transparency, we need to develop a more robust system for sharing data between Concentric and the district. This will allow us to independently share academic achievement data and demonstrate the full scope of our success.

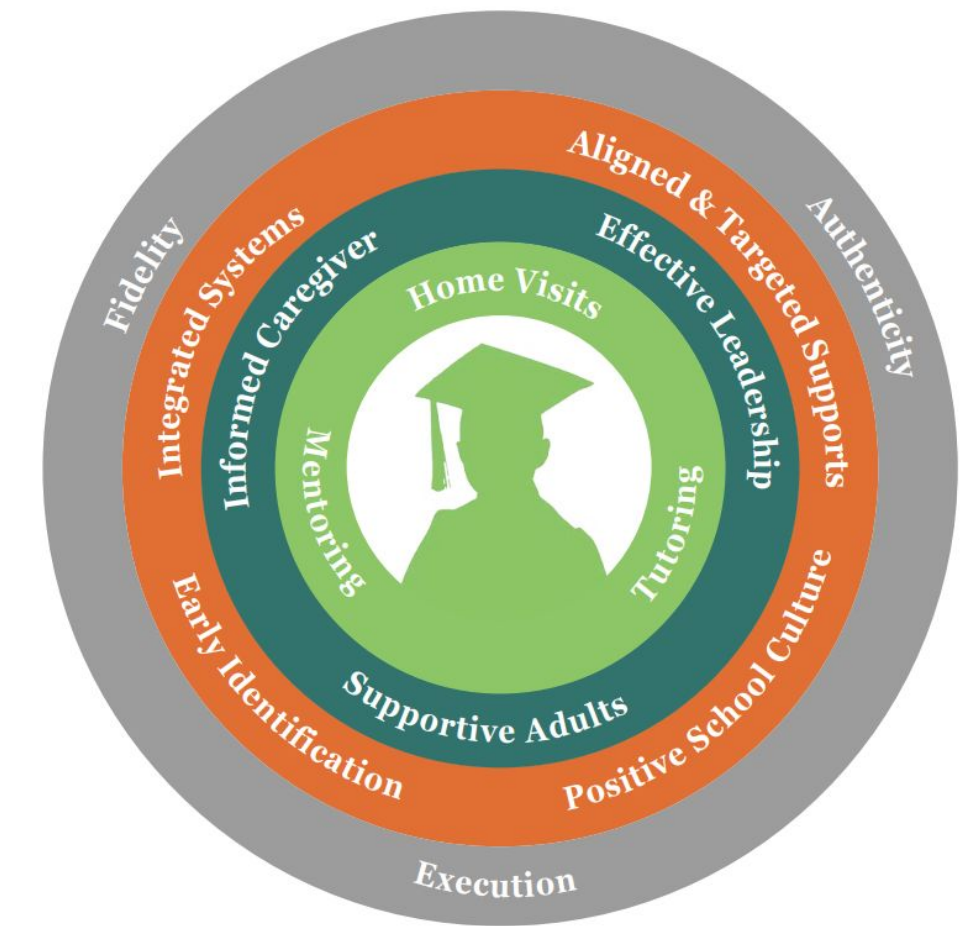

Mentoring

Prioritizing student well-being empowered students to thrive both inside and outside the classroom. The positive changes observed in attendance, behavior, and self-esteem highlight the transformative power of supportive relationships and personalized learning experiences.

Recommendations and Next Steps

- 1 Aligning Home Visit, Mentoring, and Tutoring Services
- 2 Enhance Data Sharing and Analysis Practices
- 3 Set Up Regular Meetings Between Schools and CES
- 4 Schedule Data Reporting Dates and Systems
- 5 Pilot Services Enhancements

Thank you for a successful year!
