RE: City Council Bill 21-0105

I am herein reporting on City Council Bill 21-0105 introduced by Councilmember Conway.

The purpose of this bill is to alter the applicable block faces included in the Residential Parking Plan Area 26 (Campbell Lane); and alter the hours of applicable parking restrictions to be consistent with a prior Parking Authority of Baltimore City administrative order.

The Parking Authority of Baltimore City (PABC) has reviewed the proposed legislation and discussed the intent of the bill with both the Councilmember and the Community Association Host (CAH) of RPP Area 26. Prior to this legislation's introduction, the Councilmember's Office and the CAH have engaged with and received support on this initiative from the local businesses, residents, and from Govans Elementary School.

As this is a community-based program and this legislation has community support, PABC does not oppose the passage of City Council Bill 21-0105.
