

**CITY OF BALTIMORE  
COUNCIL BILL 18-0061R  
(Resolution)**

---

Introduced by: Councilmember Stokes, President Young, Councilmembers Bullock, Costello,  
Schleifer, Scott, Pinkett, Burnett, Henry, Cohen, Clarke, Middleton

Introduced and read first time: January 8, 2018

Assigned to: Judiciary and Legislative Investigations Committee

---

REFERRED TO THE FOLLOWING AGENCIES: Health Department

---

A RESOLUTION ENTITLED

1 A COUNCIL RESOLUTION concerning

2 **Investigative Hearing – Increased Infant Mortality Rate**

3 FOR the purpose of calling on the Health Commissioner to appear before the City Council to  
4 discuss the troubling recent increase in Baltimore’s infant mortality rate and what steps can  
5 be taken to continue reducing infant mortality in Baltimore City.

6 **Recitals**

7 For many years now, Baltimore has had the sad distinction of having a infant mortality rate  
8 significantly higher than both the Maryland and national averages. In recent years, this rate has  
9 fallen significantly. However, 2017 unfortunately saw a reversal of this positive trend.

10 In 2009 Baltimore experienced a record high 27 infant sleep-related deaths. That same year,  
11 the Baltimore City Health Department and its partners launched a concerted effort to save more  
12 infant lives and eliminate sleep-related deaths known as “B’more for Healthy Babies”. This  
13 program stresses the A-B-C-D method to healthy sleep – Alone. Back. Crib. Don’t Smoke. – and  
14 has led to a dramatic decrease in the number of infant deaths.

15 In 2015 Baltimore recorded its lowest ever infant mortality rate of 8.4 per 1000 live births, a  
16 38% decline from 2009. And 2016’s 7 sleep-related infant deaths were also a record low. Last  
17 year though had already seen 12 sleep-related infant deaths in Baltimore City by mid-December.

18 It is hoped that the increase in deaths last year was simply a tragic one-time event rather than  
19 the start of a new negative trend. But even 1 preventable infant death in Baltimore City is 1 too  
20 many, and it is important not to let recent successes allow us to become complacent. The causes  
21 of the increase in infant mortality last year need to be thoroughly examined so that lessons can be  
22 learned and Baltimore can continue to move toward eliminating sleep-related infant deaths and  
23 holding down overall infant mortality in our community.

24 **NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF BALTIMORE,** That the  
25 Council calls on the Health Commissioner to appear before it to discuss the troubling recent  
26 increase in Baltimore’s infant mortality rate and what steps can be taken to continue reducing  
27 infant mortality in Baltimore City.

EXPLANATION: Underlining indicates matter added by amendment.  
~~Strike out~~ indicates matter deleted by amendment.

**Council Bill 18-0061R**

1       **AND BE IT FURTHER RESOLVED**, That a copy of this Resolution be sent to the Mayor, the  
2       Health Commissioner, and the Mayor's Legislative Liaison to the City Council.
