

harms:

- i am disabled and living in west baltimore. i was left for dead by DPW and the city with no accessible way for me to get purified and distilled water that i need for my medical devices delivered to me.
- as a result of DPW and Mayor Scotts negligence, i was endangered by baltimore city and ingested e.coli positive water on the FRIDAY when DPW was already receiving positive test results until MONDAY when the mayor finally decided to let the city know.
- i tested my tap water and it is positive for bacteria and there are LOW LEVELS of chlorine, my water is still discolored and has an odor while me and my neighbors are all still sick.
- me and a group of other disabled people have been single handedly doing DPWs job of delivering water to over 150 peoples door steps who are disabled and still sick with e.coli for the last week.

demands

- i know there are other jurisdictions in MD that got water bottle deliveries to their door step while water was unsafe for drinking.
- I DEMAND IMMEDIATE FOLLOW UP FROM DPW, THE MAYORS OFFICE, AND THE CITY COUNCIL, SPECIFICALLY ONE OF YOU ON THIS CALL TODAY, FOR THE HARM THAT WAS CAUSED TO ME AND MY DISABLED NEIGHBORS.
- I ALSO DEMAND THE WATER DELIVERIES PROGRAM TO RESUME EFFECTIVE IMMEDIATELY TO DISTRIBUTE WATER TO OUR NEIGHBORS BY THIS WEEKEND.
- i demand regular testing of the water and transparency from the city of test results and updates on finding a source of the e.coli outbreak.
