DATE:

TO

The Honorable President and Members
of the Baltimore City Council

December 18, 2018

The Baltimore City Environmental Control Board (ECB) has been requested to review City Council Bill #18-0306, Health Code – Clean Air Regulation. The purpose of the bill is to regulate the emissions from commercial solid waste incinerators, define certain terms, require the continuous monitoring of certain pollutants, set emissions limits for certain pollutants, require the production and public disclosure of certain emissions reports, require commercial solid waste incinerators to allow certain inspections, establish a certification process for air monitoring contractors, set certain penalties, and set special effective dates.

It is anticipated that the number of citations that will be issued for violations of the relevant provision(s) will have no significant impact on ECB operations. For this reason ECB has no objections to the passage of this bill.
