

**CITY OF BALTIMORE  
COUNCIL BILL 20-0202R  
(Resolution)**

---

Introduced by: Councilmembers Clarke, Reisinger, Middleton, Bullock, Henry, Burnett, Cohen,  
Pinkett, Dorsey, McCray, President Scott, Councilmember Sneed

Introduced and read first time: March 9, 2020

Assigned to: Health Committee

---

REFERRED TO THE FOLLOWING AGENCIES: Health Department, Department of Public Works,  
Department of Recreation and Parks, City Solicitor, Office of Sustainability, Office of the  
Comptroller

---

A RESOLUTION ENTITLED

1 A COUNCIL RESOLUTION concerning

2 **Baltimore's Fair Development Plan for Zero Waste: 2020-2040 and Beyond**

3 FOR the purpose of calling on the Mayor, the Board of Estimates, and all affected City agencies  
4 to formally acknowledge and move forward in implementing the “Fair Development Plan for  
5 Zero Waste.”

6 **Recitals**

7 On February 22, 2020, United Workers, joined by their contractor, Zero Waste Associates;  
8 the President, the Vice President, and other members of the Baltimore City Council; and by  
9 advocates from across the City, especially from those Southwest Baltimore neighborhoods most  
10 negatively affected by the pollution of incineration and those most active in demanding  
11 significant and timely detoxification of the air we breathe and the land we cherish, presented  
12 Baltimore’s “Fair Development Plan for Zero Waste” (the “Plan”).

13 By this Resolution, these parties are now calling for partnership and approval of this Plan’s  
14 spirit and specifics by the Mayor and City Council, the Board of Estimates, Sustainability  
15 Commission, and the Department of Public Works. The United Workers and the City Council  
16 have arrived at this decisive Resolution after 3 years of intense discussions, hearings, research,  
17 and ground-laying legislation.

18 On April 24, 2017, the City Council held its first hearing on “Moving Baltimore to Zero  
19 Waste” that brought together multiple City agencies to launch coordinated plans to advance a  
20 holistic Zero Waste plan with sustainability, public health, and job creation as crucial  
21 components.

22 In 2018, the City enacted a ban on Styrofoam. In 2019, the Baltimore Clean Air Act was  
23 enacted to regulate the emissions from commercial solid waste incinerators, a local law with the  
24 potential to force a major Baltimore major polluter, the BRESKO incinerator, to close as early as  
25 this current year.

26 Also last year the City Council approved Baltimore’s 2019 Sustainability Plan, which sets a  
27 90% Zero Waste diversion goal, expands composting collections, and insists that the City’s

**Council Bill 20-0202R**

1 recycling program be reliably and readily available to all neighborhoods (in compliance with  
2 Baltimore's Equity Assessment law of 2018). Indeed, the Baltimore Office of Sustainability has  
3 already partnered with the Natural Resources Defense Council to establish Baltimore's Food  
4 Matters program with the goals of reducing food waste to 50% of its current level by 2030 and  
5 reducing residential food waste by 80% by 2040.

6 Most recently, the City enacted the Comprehensive Bag Reduction bill, which will ban most  
7 plastic bags in the City. The Office of Sustainability is diligently working to inform  
8 Baltimoreans of this new law, which goes into effect in 2021, and is creating partnerships to  
9 distribute re-usable grocery bags throughout the City.

10 In recognition of the culmination of these years of preparation and the urgency of the mission  
11 and initiatives outlined by the "Fair Development Plan for Zero Waste," the Council, standing  
12 with its partners in this effort, calls upon all of Baltimore, the Mayor, the Board of Estimates, and  
13 all affected City agencies to formally acknowledge and move forward in implementing the Plan's  
14 recommendations.

15 **NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF BALTIMORE,** That The City  
16 Council hereby calls on the Mayor and affected agencies to adopt a Zero Waste goal to divert  
17 90% of all materials discarded in the City from landfills, incinerators and the environment by  
18 2040.

19 **AND BE IT FURTHER RESOLVED,** That the City Council calls upon the City's elected and  
20 agency leaders, neighborhood residents, businesses, nonprofit organizations, schools, and youth  
21 organizations to actively join forces to achieve this goal and to champion Baltimore's Fair  
22 Development Plan for Zero Waste as a guide and measure of our City's progress in transforming  
23 the "waste of waste" into promising opportunities for "the conservation of all resources by means  
24 of responsible production, consumption, reuse, and recovery of products, packaging, and  
25 materials without burning, and with no discharges to land, water, or air that threaten the  
26 environment or human health." (*Zero Waste International Alliance* (2018)).

27 **AND BE IT FURTHER RESOLVED,** That the Plan calls upon the Mayor and Director of the  
28 Department of Public Works to continue to inform and involve the City Council, the  
29 Sustainability Commission, the Northeast Maryland Waste Disposal, the Fair Development  
30 Roundtable, and other stakeholders as work progresses on specific Zero Waste programs and  
31 administrative policies.

32 **AND BE IT FURTHER RESOLVED,** That the City Council calls upon the Mayor and Public  
33 Works Director to work with the Plan's stakeholders to review and undertake the following Plan  
34 priorities in achieving this 90% Zero Waste goal:

- 35 a. Defend and enforce the Clean Air Act in Baltimore City, which holds polluting  
36 incinerators to higher standards than current and inadequate State and federal  
37 regulations.
- 38 b. Terminate the City's contract with BRESKO in 2021, thus allowing materials to be  
39 reclaimed using phasing-in Zero Waste infrastructure.
- 40 c. Implement a Zero Waste "bridge strategy" including:

**Council Bill 20-0202R**

- 1 • expanded collections, increased processing capacity – and transfer capacity (if  
2 needed), including transfers outside of Baltimore, for example, possibly with  
3 Baltimore County;
  - 4 • expanded recycling and composting programs, including free recycling and  
5 composting carts to all City households, recycling for all households, along  
6 with education and outreach materials on a consistent basis;
  - 7 • collection contracts with existing Baltimore-based organics collection  
8 providers to support these City-based enterprises; and
  - 9 • community scale composting sites within the City and transfer of remaining  
10 organics to recycling facilities outside Baltimore if needed.
- 11 d. Create a “\$1 Vacant Lot Program” that would award vacant lots to non-profits and  
12 community organizations based on stewardship and development proposals.
- 13 e. Paired with the preceding effort, establish an “End Illegal Dumping Fund” of \$1  
14 million annually to implement the maintenance of vacant lots, especially those  
15 currently targeted for illegal dumping, and empower residents to reclaim such parcels  
16 for productive uses such as affordable housing, gardens, farms, and play spaces. This  
17 fund would be utilized to prioritize reallocation of resources to frontline communities  
18 historically dumped on, disinvested in, and disproportionately impacted by destructive  
19 disposal activities such as incinerators, landfills, and habitual illegal dumping sites.
- 20 f. Issue Requests for Proposals to attract mission-based or worker-owned recycling and  
21 composting operators capable of meeting Baltimore's need for expanded collections  
22 into recycling for all and curbside compost collections, including provisions for:
- 23 • contracts for lengthy terms to ensure consistency; and, local hiring, living  
24 wages, benefits, and career pathway requirements to promote local career  
25 opportunities; and
  - 26 • preference for local markets, recovery of quality materials; requiring that  
27 contractors report on the composition of material, the amount of residual, and  
28 the destination of sold material; and performance-based contracting  
29 incentives.

30 **AND BE IT FURTHER RESOLVED**, That the Council calls on the Mayor, the Board of  
31 Estimates, and all affected City Agencies to formally acknowledge and move forward in  
32 implementing the “Fair Development Plan for Zero Waste.”

33 **AND BE IT FURTHER RESOLVED**, That a copy of this Resolution be sent to the Mayor, the  
34 Comptroller, the acting Director of the Department of Public Works, the acting City Solicitor, the  
35 Director of the Office of Sustainability, and the Mayor's Legislative Liaison to the City Council.
