Table 12-903(1): Canton Waterfront Area

Height Limitations - The height of structures along the waterfront shall not exceed 35 feet, except in Areas 1 through 4. Height controls are provided in Areas 1 through 4 to minimize the impact of building heights on adjacent neighborhoods. Specific locations for higher buildings are provided, as well as guidelines for building setbacks and stepbacks. The maximum building height shall be defined as the vertical distance measured, in the case of flat roofs, from the mean curb level of the highest point of the roof adjacent to the street wall, and in the case of pitched roofs, from the mean curb level to the mean height level of the roof. Where the walls of a building are not adjacent to a street curb, the height of a building shall be measured from the average elevation of the ground adjoining the walls.

Area	Height Limitations
1	Average height of the built area may not exceed 45 feet Maximum building height may be 50 feet. Maximum building height along Aliceanna Street, Chester Street, and the water's edge may be 40 feet. Additional height above 40 feet up to the maximum of 50 feet may be constructed so that it is not visible from that portion of the promenade adjacent to the area or may step up at an angle of no more than 45 degrees. The building may be setback a minimum of 20 feet from the Chester Street right-of-way.
2	Average height of the built area may not exceed 65 feet. Maximum height, excluding HVAC or other mechanical systems, is 75 feet. Maximum height for the HVAC and other mechanical systems may not exceed 90 feet. The maximum building height on Boston Street, the northwest and the water's edge may be 60 feet. Additional height above 60 feet up to the maximum of 75 feet may be constructed so it is not visible from that portion of the promenade adjacent to the area and from the sidewalk on the north side of Boston Street adjacent to the area or may step up at an angle of no more than 45 degrees.
3	The water's edge may have a maximum height of 40 feet. Additional height above 40 feet up to a maximum height no higher than the existing properties at 2351- 2439 Boston Street may be constructed so that it is not visible from that portion of the promenade adjacent to the area or may step up at an angle of no more than 45 degrees.
4	Average height of the built area may not exceed 50 feet Maximum height is 79 feet. The water's edge may have a maximum height of 40 feet. Additional height above 40 feet may be setback at an angle of no more than 45 degrees up to 79 feet.

Public Access Corridors - Minimum width of the corridors may be 50 feet, unless otherwise noted below. Landscaping, trees, lights, benches, tables, and other public amenities that will enhance, not impede, public view of the water may be permitted. All access corridors should connect sidewalk and promenade and be physically and visually uninterrupted. In cases where a public access corridor is to be located between 2 properties, the center of the corridor may be on the property line and the width of the corridor may be evenly divided between the 2 properties.

Corridor	Location
1	From a point at the approximate intersection of Boston and Aliceanna Streets south to the water between 2201 and 2121 Boston Street.
2	A 30 foot wide public access corridor may be designated between 2301 Boston Street (North shore) and 2351 Boston Street (Anchorage Townhomes), consisting of a 15 foot wide public access corridor each on 2301 Boston Street and 2351 Boston Street.
3	A 15-foot wide public access corridor may be designated between 2369 and 2371, between 2389 and 2401, and between 2419 and 2421 Boston Street.
4	A 30-foot wide public access corridor may be designated between 2439 and 2449 Boston Street.
5	From a point at the approximate intersection of Luzerne Avenue and Hudson Street due south along the axis of Luzerne Avenue to the waterfront park. In the Luzerne Avenue corridor, if financially necessary and subject to the review and approval of the Commissioner of Housing and Community Development, a second level pedestrian bridge may be allowed.
6	From a point at the approximate intersection of Lakewood Avenue and Boston Street due south along the axis of Lakewood Avenue through to the water.

Table 12-903(2): Fells Point Waterfront Area

Height Limitations - The maximum building height may be defined as the vertical distance measured, in the case of flat roofs, from the mean curb level of the highest point of the roof adjacent to the street wall, and in the case of pitched roofs, from the mean curb level to the mean height level of the roof. Where the walls of a building are not adjacent to a street curb, the height of a building may be measured from the average elevation of the ground adjoining the walls.

Area	Height Limitations
1	The maximum building heights may be as set forth in the Constellation PUD.
2	The maximum building heights may be as set forth in the Constellation PUD.
3	Thames Street elevations may be no higher than 40 feet. A building addition up to a maximum of 53 feet will be permitted if it is set back and designed so that it is not visible from the street frontage opposite this area.
4	Maximum building height may not exceed 40 feet.
5	Maximum building height may not exceed 60 feet, except on the property known as 1000 Fell Street where rehabilitation of the roof structure to accommodate a seventh story is permitted, provided that this seventh story is recessed so as not to be Subject ton from the street frontage of the subject property, and a further exception is provided for the property known as 932-944 Fell Street (Belt's Wharf Condominium Property) for a building addition up to a maximum of 74 feet if recessed 40 feet from the street frontage of the property.
6	The average height of built area may be no more than 50 feet, with a maximum height of 60 feet. The maximum height along the water's edge is 40 feet. Additional height over 40 feet up to the maximum of 60 feet may be constructed so that it is not visible from that portion of the promenade adjacent to the area or may step up at an angle of no more than 45 degrees.
