Recitals

The Mayor and City Council of Baltimore recognizes that the selling of alcohol is a legitimate activity and seeks to encourage safe and responsible alcohol practices by consumers and alcohol-serving businesses. At the same time, the Mayor and City Council seeks to protect against threats to public health and safety due to the impairment of motor skills, decision-making, and judgment associated with excessive and unmanaged sales of alcohol.

In its consideration of this Ordinance and the findings, determinations, and standards adopted by it, the City Council has reviewed studies addressing the impacts of alcohol-related land uses on the public health, safety, and welfare. Through a series of community discussions and public meetings, residents have communicated their experiences with high levels of nuisances associated with retail alcohol sales that have jeopardized their quality of life. These nuisances include, for example, public inebriation, assaults, fights, violence, driving under the influence of alcohol, public urination, littering, loitering, graffiti, noise, vandalism, and other disruptive behaviors detrimental to the peace, safety, and quiet enjoyment of neighboring properties.

The inappropriate location or inadequate management practices of establishments engaged in the sale of alcohol beverages present City residents, businesses, property owners, shoppers, and visitors with public health, safety, welfare, and quality-of-life problems that include driving under the influence of alcohol, crime, assaults, domestic violence, public inebriation, littering, loitering, obstruction of pedestrian traffic, noise, overuse of local parking, interference with children on their way to school, interference with shoppers using the streets, and defacement and damaging of

structures.

According to the State standard of one license per every 1,000 residents, Baltimore City has more than twice the number of liquor licenses than it should. Studies show that increases in the availability of alcohol outlets are associated with increases in crime rates, violence, and automobile crashes in municipal areas. Police arrest records show that alcohol-related offenses, such as public drunkenness and assaults, vary according to the concentration and density of retail alcohol outlets in the community. In Baltimore City, each increase in the number of alcohol outlets was associated with a 2.2% increase in the count of violent crime. Off-premise alcohol outlets doubled the risk of violent crime and were specifically associated with increased homicide rates.

Law enforcement personnel find alcohol is involved in many arrests, particularly assaults, robbery, drug offenses, and domestic violence. Also, alcohol use can be found throughout all community settings, including residences, retail alcohol outlets, streets, sidewalks, parking lots, and vehicles.

Alcohol is the number one drug of choice among youth in Baltimore City, with 56% having tried alcohol and 19% starting before age 13. Studies show that more than one-third of high school students routinely obtain alcoholic beverages from retail outlets and that students do so by a variety of methods, including theft, purchase by adults, failure of clerks and servers to request age verification, and use of false identification, thus hampering parents' efforts to reduce their children's exposure to alcohol.

In Baltimore City, alcohol outlets in communities are strongly related to poor outcomes for youth (e.g., school performance, violence exposure, and drug use).

The sale of alcohol after midnight increases the risk of drinking and driving, and of crime and violence, causing an increase in law enforcement activities.

The State of Maryland has delegated authority to Baltimore City to preserve the health and safety of citizens living in Baltimore City.

Implementation of this Ordinance will act as a proactive community tool to prevent problematic alcohol outlets from interfering with the quality of life of Baltimore City residents and will serve as a protective factor for all community members.

The Mayor and City Council of Baltimore finds and determines that the existence of these problems creates serious impacts on the peace, health, safety, and welfare of residents, including fear for the safety of children, shoppers, and visitors to the area, deterioration of neighborhoods and commercial activity, devaluation of property, and destruction of community values and quality of life.

Alcohol is a legal but potentially hazardous product that requires special regulatory and planning attention. Local governments should thus retain oversight and promote public involvement to ensure a safe alcohol environment. This means that communities should maintain an active regulatory posture regarding land use controls for alcohol outlets.

The provisions of this Ordinance can serve as a tool to assist City agencies, officials, and personnel in providing a balanced approach to dealing with new licensees and problematic outlets throughout Baltimore City.

This Ordinance is intended and designed to reduce alcohol-related environmental problems and conditions by regulating the location of alcohol outlets in relation to one another, by regulating their proximity to sensitive-use areas and facilities used by children, families, and the general public, and by imposing conditions on alcohol outlets or denying conditional uses as appropriate to prevent undesirable community impact of these uses.
