

MATClinics

- Largest comprehensive outpatient addiction group in Maryland
- 8 offices across the State
- Census of >2,200
- Low-threshold buprenorphine (Suboxone) access
- Broad behavioral health services adjunctive to prescribing medications to treat SUD
- Clinical supervision by Dr. Enrique Oviedo, MD

How are patients referred to treatment?

Levels of Care Need to Align with Patient Needs

ASAM Levels of Care

Outpatient (OP) Intensive
OP Inpatient Hospitalization

Mismatches in care can drive patients to avoid treatment

- The American Society of Addiction Medicine (ASAM) sets criteria for levels of care
- **Outpatient level of care is the least intrusive and is effective for >85% of MATClinics patients**
- More intensive levels of care are appropriate for more complex disease states
- Inpatient care should be reserved for the most severe cases
